

InventoryMgr™

Managing Inventories for Housing Authorities

InventoryMgr™, Mobizent's Web-based Inventory Management solution provides Housing Authorities with a customized inventory solution built for the new HUD requirements for property management.

InventoryMgr™ is a comprehensive back-office solution for Housing Authorities. It provides the management and control of critical inventories by property to meet new HUD requirements for property management. The solution not only allows Purchase Requests and Orders Issuance with approval cycles but also a complete connection to any type of mobile solution in the field such as WorkOrderWorks and InspectWorks to provide realtime interfaces to the inventory database. Designed to run on Smartphones, Tablets, laptops and ruggedized handhelds, InventoryMgr™ provides highly

sophisticated inventory modules that intelligently work together to allow users to monitor and control inventories needed for maintenance support and inspection personnel. InventoryMgr™ also has a set of comprehensive smartphone and tablet solutions that easily and seamlessly integrate into the authority's inventory and other external systems.

InventoryMgr™ is a cost-effective solution that reduces the amount of time spent on inventory counts and manual Purchase Order routing by allowing users to capture all the required information and approvals on the Website. In addition, InventoryMgr™ also provides latest HUD requirements like property management roll-ups. InventoryMgr™ ensures that the

entire inventory process is streamlined, from the initial entry of the information through the reporting and data collection analysis, to ensure that Housing Authorities save time and money. InventoryMgr™'s "Investigative Search" feature provides data analysis and data visualization capabilities to correct many inventory issues during an audit.

InventoryMgr™ also provides a complete reporting solution and export feature so the inventory can be imported into your existing General ledger and Tenant Management Solutions.
